Alpine Classification Working Group
USSA Staff, Other Interested Persons

From: Allen Church, Chairman
Alpine Classification Working Group

Subject: Zeroing Adders for 2012-2013 USSA APS Seeding List.

The calculation of the adders to be applied to the Season 2013 First Seeding List has been completed following the previously determined system. The current FIS and USSA lists based on the past season were utilized.

The top 100 or more USSA Points List competitors of each gender in each event on the FIS Point List were identified and listed. Their comparable points on the USSA Points List were also listed. For each racer, the USSA points were subtracted from their respective FIS points to obtain a difference. For each gender and event, the average and standard deviation of the differences were calculated for subgroups of 75 competitors. The average and one standard deviation for each event were summed and the result rounded up or down to the nearest hundredth of a point.

This result for each event rounded to the nearest tenth point constitutes the respective point adders, as used in past seasons, to be applied to each gender and event as follows:

	DOWNHILL	SLALOM	GIANT SLALOM	SUPER G	SUPER COMBINED
WOMEN	2.20	4.50	4.20	3.00	1.10
MEN	2.90	4.20	2.40	2.80	7.30

The raw data received for making calculations this season included 0 to 3 competitors within the calculations range for each event that had maximum USSA points expressed as 990. Those so identified were all foreign competitors. For each event they were moved down to positions 83, 84 and 85 and listed by their original position on the list flagged with a double asterisk. As listed, they are outside the calculation range.

The spreadsheets used for making these calculations are on file.

A summary sheet showing the most recent five years' adders is attached for reference. The spreadsheets used for making these calculations are on file.
